Camp RZR volunteers please call Nicole Gilles at (760) 996-8983 or email ngilles@asasand.org

ARE YOU MAINTAINING YOUR TOYS DURING THE SUMMER?

Bryan Henry

As we eagerly await the duning season, we need to make sure to keep our toys in tip-top shape. Whether it's your sand car, ATV, UTV or even the generator in your RV, it's a good idea to run them at least once a month for about 20-30 minutes. If you haven't run the motor for a while, it's a good idea to drain the tank, fuel lines and carburetor/fuel injection system and refill with fresh fuel. With the prevalence of ethanol, fuel systems are more likely to be damaged during long term storage. Batteries will also need to be checked after sitting all summer.

This is also a good time to perform any maintenance tasks, including oil and filter changes, air filter cleaning/replacing, repacking wheel bearings, replacing chains and sprockets, and checking tires for leaks and other damage. Spending some time with your toys now will help make for an enjoyable dune season!
